DETAILED ACTION

Applicants response filed 10/31/2008 is acknowledged.

Response to applicants Remarks:

Claim Rejections - 35 USC § 102

Applicants amendments overcome the previously presented rejections under 35 USC § 102.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Previously presented rejection of claims 1-11 as being obvious over Hosokawa et al. (WO 9404520) is maintained for reasons of record.

Applicants argue that since the claims are amended to remove the furanone compounds (that is the side chains of the instantly claimed compounds do not have the furanone moiety) and since Hosokawa neither teach nor suggest the effect of the presence or absence of such a substituent, the claimed compounds are non-obvious. This is not persuasive because: as stated in the previous office action page 4, last three

Art Unit: 1625

lines, the structural features necessary for the intended use of the compounds, is independent on the furanone moiety but largely dependent on the benzaldehyde part of the molecules. This would have been obvious to one skilled in the art of medicinal chemistry since Hosokawa' reference also teaches compounds in which cyclohexanone replaces furanone (see strictures shown on the bottom portion of page 4 of the previous office action). Thus applicants arguments that the instant compounds are no longer furanones and should be termed phenol derivatives is not persuasive because the major portion of the instantly claimed compounds and the prior art compounds are the same, the difference amounting to deletion of structural elements furanone and cyclohexanone from the compounds of Hosokawa et al. Such deletion of groups is routine practice in the art of medicinal chemistry to simplify structures of otherwise complex known natural products.

Applicants have not shown any unexpected activity for the claimed compounds for secondary considerations.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is vague because in the claim 1, last line, the last comma in the R4 variable suggests that the structures on page 4 of 20 are part of the formula (I).

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
